2. ELINT EOB and Technical data for filled in draft box scores was not completely available but will be ready for discussion next week.

3. Telemetry, [redacted] 25X1
draft box score sheets had been filled in. Considerable discussion of these led to the tentative selection of sheet Mod A, oriented more to scoring on the basis of information needs than on actual measurements made. The Mod A box

score sheet still contains some ambiguity in its terms even though alternative sources of input numbers were quite comparable. The NSA representative agreed to redraft the items in the Mod A form to clarify and to attempt achievement of exhaustiveness and mutual exclusiveness of the items. Later there will be some effort needed to finalize on the scoring item values (probably different ones for each type of event) and to define relative importance numbers for each of the event types.

25X1 4. Next week the ELINT box score forms will be discussed (including the one for GS). Also to be discussed is the sheet proposed by the CIA representative should it be available and filled in for a few sample events. Hopefully NSA will have its redraft of Telemetry available at least for distribution at the next meeting.
